

## FEATURED PROJECT

### Pro-Built Completes a Rooftop Dining Room on Pikesville's Mari Luna Latin Grille

Mari Luna Latin Grille is the first development project to benefit from the Baltimore County Pikesville Redevelopment Fund. Owned and operated by Chef Jaime Luna and his family, the restaurant is the second the family has opened in Pikesville. Pro-Built Construction, Inc. was happy to attend the opening celebration of the restaurant, and to help introduce other attendees to the open air, rooftop deck complete with a minibar that they constructed from primarily Trex products. The rooftop deck attracts attention for this upscale restaurant from the busy downtown Pikesville streetscape, and is available to reserve for private parties.

Mari Luna Latin Grille at 1010 Reisterstown Road offers patrons cuisine from South America, Latin America and the Caribbean, and has seating for approx. 175 people. 410-653-5151

# THE BUILDING BRIEF

Volume IV, December 2008

The tri-annual newsletter connecting Pro-Built Construction, Inc. to its family of customers and colleagues

## Pro-Built Construction is Named, "Best of Howard County" Plus, receives the TrexPRO Elite Award, Trex®'s highest level of distinction

Pro-Built Construction, Inc. has called Highland, Maryland our home since 1981. For a company that has laid its roots in Howard County, Maryland from Day One, being recognized as the leader in our industry by our own community has been a great honor. Over the past 27 years, we have done work on thousands of homes, inside and out, all across

the state. However, Howard County is our homebase and location of our offices and showroom. This is the one of the reasons why we were thrilled to be named Howard County's Best Remodeler, voted by the residents of the county, and named in *Howard Magazine*.

Another reason why this award has meant so much to us, is because it recognizes a division of our company that many people don't know about. Pro-Built Construction has achieved great success and has built a solid reputation for leading the way in deck construction and design. We love building decks. However, we're not Pro-Built Decks. We're Pro-Built Construction, and we also spend a considerable amount of time and effort in home remodeling and building custom homes. To be named Howard County's Best Remodeler, and to receive an Honorable Mention for Best Homebuilder, recognizes our Remodeling and New Homes division for an excellence that has been building very quietly over the past couple of decades.

We hope that this award will let people know that we have a high standard of excellence in everything we do. We're thankful to all the residents of Howard County who voted for us. And don't worry- we didn't lose the Best Deck Builder to some other company. *Howard Magazine* didn't list that category for consideration...yet!

You can check us out in December's issue of *Howard Magazine*, and more information about us will be published in future issues.

Trex is arguably the leading brand of alternative decking, railing, fencing, and trim products designed to maximize your outdoor living experience. Since they began selling their products through contractors, Pro-Built Construction has maintained a close relationship with the company. In fact, since 1998, Pro-Built Construction, Inc. was given the distinction of being one of Trex's leading contractors. In 2002, Pro-Built was named a TrexPro Gold contractor and continued to provide feedback to Trex directly to improve the product. In 2007, Pro-Built was the #1 Trex contractor in the state of Maryland. We are very proud to announce that this year, we are the #1 Trex contractor in the country.

Trex awarded Pro-Built Construction, Inc. with the TrexPRO Elite Award for achieving top performance in the promotion and installation of their products. We believe in their line of products, and have a very high level of experience and training in the installation of their products. We look forward to continuing the dialogue between us and Trex to ensure that their products will maintain the status of offering the best quality composite material available today.

Pro-Built staff with the homeowners of a deck we designed and built with Trex products, to be featured in Trex marketing for 2009
